

SEPCO SolarViper – PNG Solution

Features

- ❖ Viper system comes complete with solar power assembly, fixture, bracket and all mounting hardware.
- ❖ Poles are designed to meet wind load specifications.
- ❖ Solar panel ranges from 10Watts to 425Watts.
- ❖ Battery size allows minimum of 5 days backup power for times of poor sunlight.
- ❖ Complete with LED and driver to operate the light fixture from solar- charged battery.
- ❖ There are dimming and finish options.
- ❖ Light fitting brackets can either be a long elliptic arm SP-Side of Pole bracket ranging from 1.2m to 2.4m or a short arm ST-Side of pole Tenon Bracket ranging from 1.5m to 7.3m.
- ❖ Brackets mount directly to any round or square pole.

Easy installation: Set the pole, mount the complete assembly using the fixture mounting bracket onto the pole and you have off-grid lights in PNG

SolarViper – high powered LED solar lighting complete with solar panel, battery and Adaptive Lighting Control (ALC) – all pole-mounted
